

# ROOM to Grow

A glimpse of adorable  
and creative rooms  
for Katy families

*Written by Kirsten Cornell*

## **Butterfly Garden**

Infuse your child's space with springtime colors, floral accents, and whimsical accessories. The mirrored butterflies combined with appliques give an illusion of flight and actually make the room look bigger. Don't forget a great reading space created by the papasan chair filled with brightly-colored pillows.

## Hobby Haven

Celebrate your kid's interests and hobbies without a lot of clutter. Using a shelf above the bed, arrange various sports balls, records, a skateboard, or even books on related topics. This parent also framed ribbons, medals, and photos together in a large frame reminiscent of a shadow box. Utilizing drawers under the bed will also help keep loose items out of the way and maximize storage.

## Beach Retreat

A nod to the rustic look, this driftwood-inspired room makes for a teen haven. Use neutral bedding with pops of sky blue or light pink to embrace oceanic tones. Liven it up with a fun pillow featuring a catchy saying. The plank board ceiling with a distressed finish helps invite the outdoors in. Choose a favorite friend or vacation photo to put on a canvas, creating your own personalized art.

### Perfectly Posh

Celebrate your daughter like the princess that she is with this delightfully royal décor. Striped walls in varying shades of pink provide the backdrop for the grand light fixtures. Mount a crown on the wall and attach sheer fabric to create drapery and a pseudo headboard for your crib. Complete the look with off-white furniture and delicate accessories.

## Raceway

This upgraded version of a race car bed is ideal for tweens and teens. The built-in shelving surrounding the Lambo look-alike is great for displaying trophies, books, or additional model cars. Choose a modern wallpaper or paint job with wide streaks to give the illusion of speeding by. Just don't be surprised if you hear "vroom" noises coming from the other side of the bedroom door.

## Cheery Chic

Bold colors take center stage in this converted loft room. Utilize the eaves of the house to help shape built-in cubby holes and a bed. Cover the floor with psychedelic rugs, then add trendy lamps and a cozy chair for reading or studying. You can even mount a piece of funky wall art to the slanted ceiling for an ultra-hip look. **KM**
